Schedule "C" Rate Fees for Wastewater System
For Service Areas of Hawthorne Area
Effective July 1, 2023

Cost Per Month

1. Sewer User per 1,000 gallons	\$	2.08
2. Sewer Capitalization Fee per 1,000 gallons	\$.88
Plus \$5.00 per month for USDA Loan Reimbursement	\$	5.00

The sewer rates consist of a Sewer User Fee and a Sewer Capitalization Fee. This is a result of a large grant received by Hawthorne Utilities in 1991.

Sewer Averaging Period:

The fees are based upon an average of your water consumption during the billing cycles starting approximately **October 17 and ending approximately February 18**. During these four months, the sewer fees are billed each month on the actual usage. After these four months, an average of the four winter months is used to calculate your charges for the remaining eight months. This allows for outside watering during the summer months without an impact to your sewer fees.

If service starts with Hawthorne Utilities before the averaging months, an estimated amount will be used based on the average family comparison to the new customer.
