# SMMPA EV Charging Network
Using the ChargeHub App for Level 2 chargers

The Level 2 chargers require users to pay for charging via the ChargeHub App. The ChargeHub app can be downloaded via the Apple or Android apps stores and is free. The user will need to enter credit card information into the app in order to use it for charging.
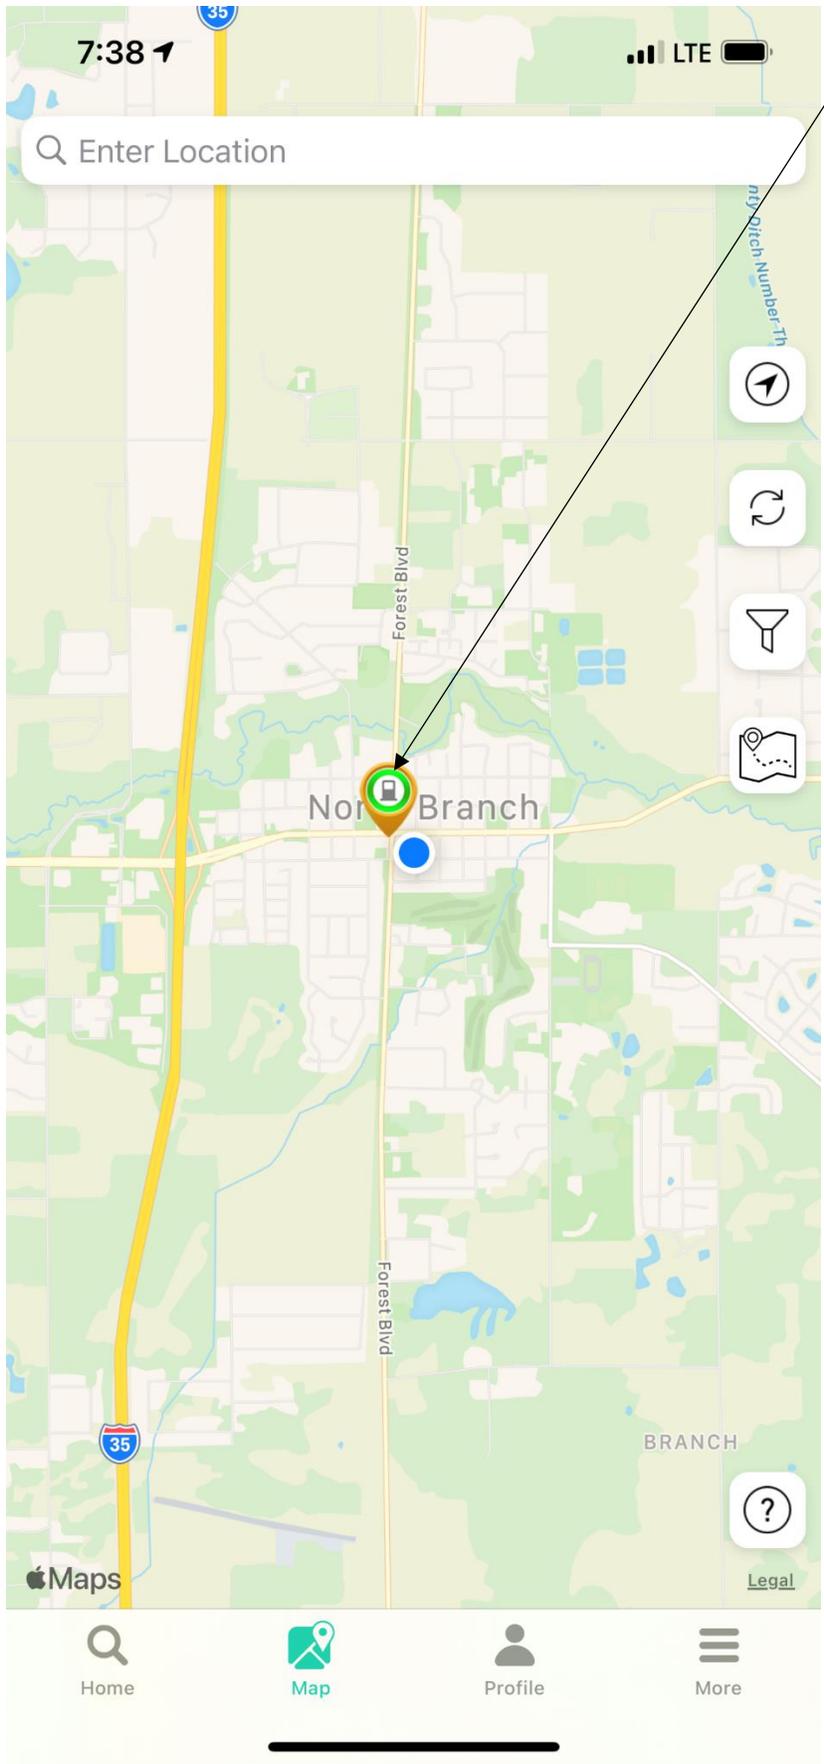

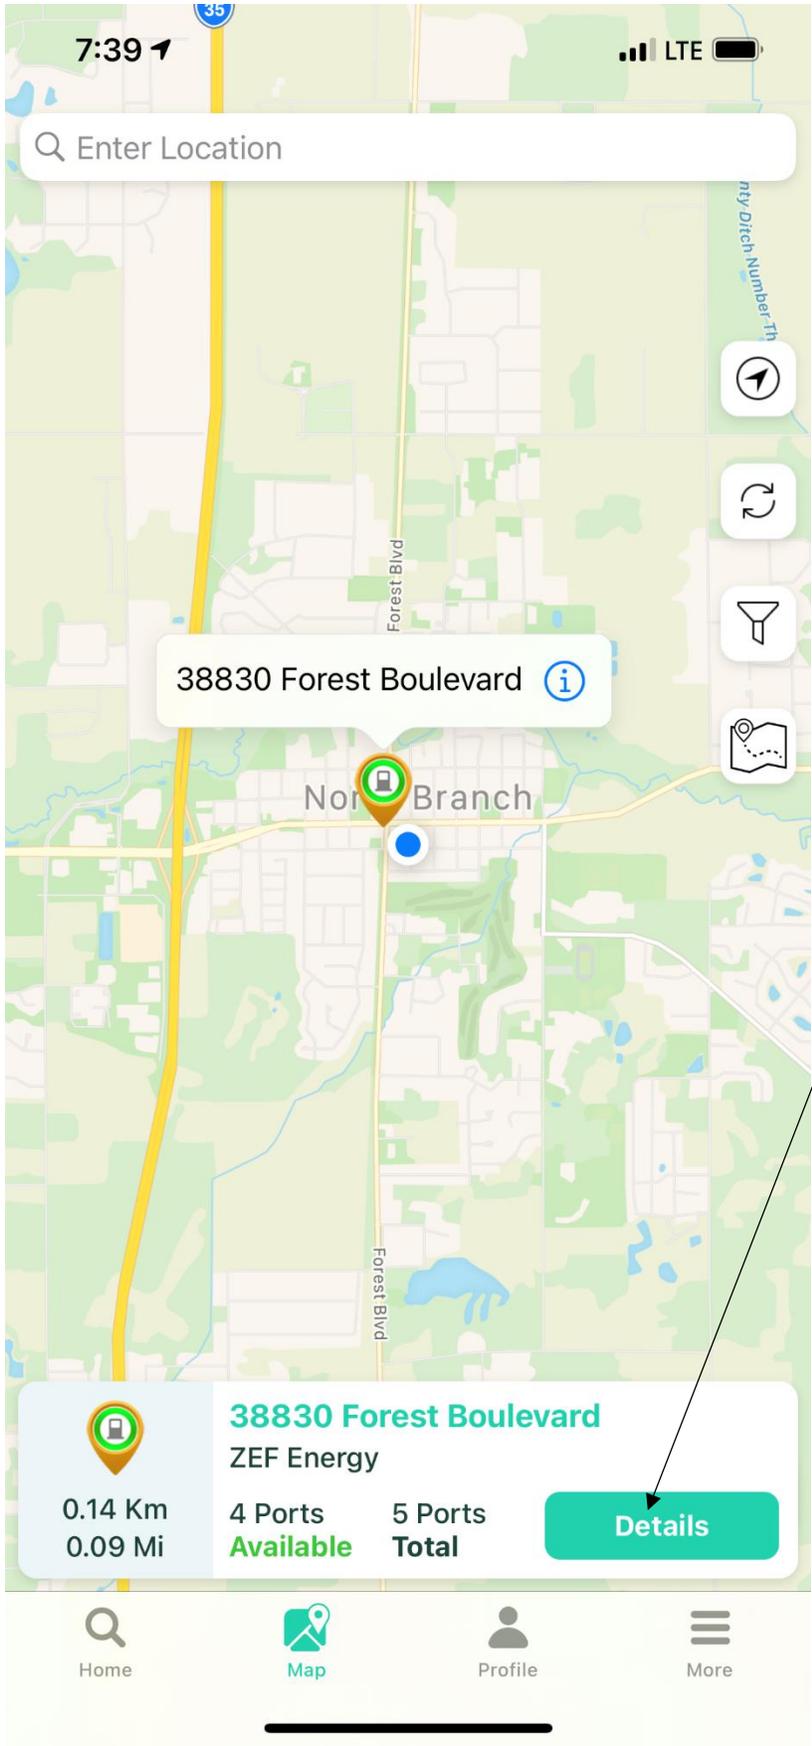

Open the App

When you open the app, click on the "MAP" either as the first icon or at the bottom of the screen.

Click on the arrow to use your location and to find EV chargers close to you. Or enter your desired location in the search bar.

Once you have your desired EV charger found click on the green and orange icon to view EV charging details In this case, we'll use the North Branch Water and Light's EV Chargers.

After selecting your desired charger, you will be able to see how many chargers are available, how far away it is from you, the address they are located, and a detail button that you will click if you wish to start charging.

Click "Start Charging" to choose the charger and which plug you wish to use. At this point if you have not created an account, you will be asked to.

If you have not used ChargeHub before, it will ask you to set up a PassPort Account where you can fund your charging sessions. You can use a credit card, ApplePay or GooglePay. Follow the directions on the screen to add funds.

Physically choose which plug you wish to use. The "front" plug is holstered to the charger on the left side as you face the charger, the back plug is on the right. You need to push the "trigger" on the plug to release it from the holster.

Hello!
My port ID is
10307

The Plug Name is on a tag on the charger. The "front" plug is displayed on the front, the "back" plug is displayed on the back.

Once you know the plug you will be using, hit "select" for the corresponding plug in the app.

Start Session

If you already have funded your account, you will be able to start a session by clicking the "start session" button. Once the session starts a status screen will appear.

Once the charging session is completed is "end session", disconnect the plug from your vehicle and return it to the holster (you will have to pull the trigger to get the plug to seat in the holster).

The cost of your charging session will be deducted from your funds.
