

## **Policy on Use of Video Recording Equipment and Cell Phones with Cameras**

Advances in video technology and equipment, including cell phones with cameras, pose a new threat to the safety and privacy of our citizens and guests, and there is a cause for concern that pictures taken without permission could be used unethically. This makes it necessary for the City of Oak Ridge North to restrict the use of video recording equipment and camera-equipped cell phones.

Effective immediately, no picture taking is allowed in restroom and pool area.

Anyone caught taking pictures of another person without their permission or knowledge will be reported to authorities and it may lead to termination of their pool pass.

The Pool Manager may make an exception for photos taken for use in promotional materials, but no photos will be taken in areas considered "private" areas. Prior approval must be given by those being photographed.

Thank you for your cooperation with this matter.
