Recommended by:	Board of Selectmen No – Selectmen Morrin	Yes – Selectmen Kruckas, Talbot, Barnes , McCarthy	
	Finance Committee Town Manager	Yes 3 - 0 Yes	

*Explanation*: The language from the state law is below. This would allow the Town Meeting to dedicate funds for a purpose.

"Notwithstanding section 53 of chapter 44 or any other general or special law to the contrary, a city, town or district that accepts this paragraph may dedicate, without further appropriation, all, or a percentage not less than 25 per cent, of a particular fee, charge or other receipt to any stabilization fund established pursuant to this section; provided, however, that the receipt is not reserved by law for expenditure for a particular purpose. For purposes of this paragraph, a receipt shall not include taxes or excises assessed pursuant to chapter 59, 60A, 60B, 61, 61A or 61B or surcharges assessed pursuant to section 39M or chapter 44B. A dedication shall be approved by a two-thirds vote of the legislative body of the city, town or district, subject to charter, and may be terminated in the same manner. A vote to dedicate or terminate a dedication shall be made before the fiscal year in which the dedication or termination is to commence and shall be effective at least for 3 fiscal years."

#### ARTICLE 5.

I move that commencing with fiscal year 2022 the Town dedicate 100% of the revenue raised from the Town's local tax on retail marijuana to the Water Filtration Plant Stabilization Fund, this dedication to be effective for forty fiscal years.

Recommended by:	Board of Selectmen No – Selectmen Morrin,	Yes – Selectmen Kruckas, Talbot, Barnes McCarthy
	Finance Committee	No 3-0 Yes (Reduce %)

**Explanation:** This article would tie revenue raised by the Town's local sales tax on retail marijuana (3%) to the Water Plant Stabilization Fund created in Article #3. In the past year of operation, the local tax generated \$164,000 of revenue.

#### ARTICLE 6.

I move that \$7,300,000 is appropriated, in addition to the \$6,000,000 previously appropriated under Article 14 of the warrant for the Town Meeting held on May 8, 2017 for a total appropriation of \$13,300,000, for the design, and construction of an iron and manganese removal plant, including the payment of costs incidental or related thereto; that to meet this appropriation the Treasurer with the approval of the Board of Selectmen is authorized to borrow said amount under Chapter 44 of the General Laws or any other enabling authority; that the Town Manager, with the approval of the Board of Selectmen is authorized to contract for and expend any federal or state aid available for the project; and that the Town Manager and the Board of Selectmen are authorized to take any other action necessary or convenient to carry out this project. Any premium received upon the sale of any bonds or notes approved by this vote and all prior votes of the Town that authorized a borrowing, less any such premium applied to the payment of the costs of issuance of such bonds or notes, may be applied to the payment of costs approved by this vote and such prior votes, respectively in accordance with M.G.L. c.44, §20, thereby reducing the amount authorized to be borrowed to pay such costs by a like amount.

<b>Recommended by:</b>	Board of Selectmen	Yes 5
	Finance Committee	No 3 -0
	Town Manager	Yes

*Explanation*: This vote will increase the appropriation for the Water Filtration Plant from the \$6 million approved in 2017 to the current cost estimate of \$13.3 million. It authorizes the Town to seek additional assistance through grants. Additional information about the costs and design of the Plant are on the following pages.

#### **Consent Articles (1-9)**

Warrant articles on a Consent Agenda are exceptions to the general process of Town Meeting. The Select Board, Moderator, and Finance Committee can identify, for Town Meeting consideration, those articles that they believe should generate no controversy and can be properly voted upon without debate. These articles are put on the Consent Agenda to allow motions under these articles to be acted upon as one unit and to be passed without debate. At the call of the Consent Agenda, the Moderator will read out the numbers of the articles, one by one. If one or more voters object to any particular article being included in the Consent Agenda, they say "HOLD" in a loud voice when the number is called. The article will be removed automatically from the Consent Agenda and restored to its original place in the Warrant, to be debated and voted under the usual manner.

After the calling of the individual items in the Consent Agenda, the Moderator will ask for a motion that the voters pass all items remaining AS A UNIT on one vote. Use of the Consent Agenda process makes the Town Meeting more efficient by speeding up the handling of non-controversial items.

Explanation: Currently, the Town has two payloaders: a Komatsu WA 320 purchased in 2003 and a John Deere 544G purchased in 2006. The Town under this article would replace the older machine this year. The operators have noticed the machine is starting to lose power and there appears to be some slippage in the transmission. These are very costly repairs to make on a seventeen-year-old machine. ### Ware Fire Department Fire Engine and Command Vehicle Replacement Plan

May 5, 2021

#### **Overview:**

Currently the Ware Fire Department has two pieces of fire apparatus that should be under high consideration for replacement.

Engine 2 is a 1000-gpm Class A pumper truck purchased in 1987. Carrying 500 gallons of water, it responded for many years carrying our extrication tools (Jaws of Life), equipment for brush and car fires along with hazardous Materials mitigation resources. This unit is currently 33 years old.

Engine 1 is a 1994 KME 1250-gpm Class A pumper with a 750-gallon water tank. This unit previously owned by Orleans Fire Department, was purchased as an interim measure when Ware's 1981 Hahn pumper unexpectedly had to be removed from service. We had hopes of replacing the 1994 KME in 2020. It is currently 26 years old.

The projected costs of repairs, challenges with reliability, coupled with design, safety, and technological advancements, both units are beyond or near their prospective 30-year service life. Currently the Ware Fire Department only has a Single Class A pumper that is less than 10 years old.

#### Narrative:

Engine 2: This Engine no longer meets the response needs of the Department. Current safety standards such as seat belt requirements, interior cab mounted Self Contained Breathing apparatus and ability to transport a 4-5 person crew are not met. This unit is mounted on a commercial chassis that has always been considered underpowered. A condition that has only worsened with time and use. Currently it is mainly used for brush fires and in some occasions to assist where remote water supply is required. The on board Foam system no longer is operational as the tanks and supply lines to the pump need major repairs. Moderate body rust is noted as well.

Engine 1: This Engine was manufactured for an area on Cape Cod and was not powered or geared for the topography consistent with our area. This has been a challenge since its purchase. It was also exposed to a significant amount of salt and weather prior to our acquisition. The paint on the vehicle is oxidized and corroded in certain areas. Areas in the pump house, valves and linkage, are showing signs of rust and decay. All issues that most likely will require costly repairs over the next few years.

#### **Request and Plan:**

I am requesting support for the immediate replacement of Engine 2 with a new 2021 Class A pumper and associated equipment. This new apparatus would be designed to meet the current response and scene mitigation requirements of the Ware Fire Department. Such design would be in accordance with NFPA 1901 Standard for Automotive Fire Apparatus. Current estimated cost of replacement is \$625,000.00. Currently, new fire apparatus of

this type are taking over a year to build. Taking action now would hope to see a new unit in summer of 2022. See attached drawings for clarification of design requested.

I would also recommend that Engine 1, the 1994 KME be scheduled for replacement in 2023.

#### **Command Vehicles:**

#### **Overview:**

Currently both command vehicles are near or over 100K miles. These vehicles are operated for daily operations by the administrative staff during daily duties and responding to Fire and EMS incidents acting as the primary platform for Incident command, inspection and code enforcement.

#### Narrative:

Car-2: 2004 Chevy Tahoe. This Vehicle was purchased used from the Town of Palmer at or around 2012 to replace a previous car that was taken out of service due to mechanical failure. It currently has mileage of 98,908, and its 16 years old. Current issues with the vehicle include the following. Body rust around rear wheel well, Driver's door is damaged and has undergone repairs but still hard to close, (2) error engine codes are active in the vehicle, Speedometer not functional and AC blower works intermittently. The Windshield leaks causing moisture to condensate inside the vehicle. Other electrical failures have occurred causing the emergency lights to fail and frequent burnout of OEM chassis bulbs.

Car-1: 2011 Chevy Tahoe. The Town purchased this vehicle new in 2011. It currently has 106,000 miles. Although operational and in good condition, its approaching 10 years old and mechanical expenses are likely to increase. The vehicle has been involved in a few low speed accidents over the years effecting the body integrity as well.

#### **Request and Plan:**

I am requesting support for the replacement of Car 2 with a new 2021-22 similar SUV style vehicle and associated equipment. Estimated cost is 60,000.00. I believe we could plan on consideration at the Annual town meeting in 2021.

I would also request plan for the replacement of Car 1 with a new 2022-23 similar SUV style vehicle and associated equipment for 2022.

#### **Conclusion:**

All of the above-mentioned units are emergency vehicles that we rely upon to function and transport our firefighters and equipment safely to and from incidents. Such reliability is imperative to the Ware Fire Department daily and emergency operations. Although maintained, vehicles this age are much more likely to have mechanical failure at times when needed most, during the Emergency.
