The Town of Ware Selectboard is inviting you to a public forum **Thursday, November 12, 2020 at 7:00pm**. The Town is pursuing a USDA Rural Development program to build a new Water Filtration Plant (WFP) at Barnes Street. Most recent engineering plans predict the WFP will cost \$10-12 million dollars. This will need to be resubmitted to the USDA for consideration. It will also need another Town Meeting vote to fund the project. This public forum will include a brief presentation from the engineers and will allow for questions and answers from the audience.

The USDA wants to hear from YOU! The Town of Ware is eligible for the funding because the population is under 10,000. With the 2020 Census, this number may increase and make the Town ineligible. We need people to show up and speak up if you would like to see this project come to fruition!

Attendance may be in person at the Senior Center or via Zoom digital media. To attend in person you must wear a mask and practice social distancing guidelines. If you attend via the digital platform Zoom, please mute yourself upon entry.
