OFFICE OF THE TOWNSHIP ENGINEER

Windy Willow Way Area Improvement Project

Letter to Residents (Updated)

October 2, 2020

Dear Resident,

As you may be made aware of, the Township Committee has awarded a contract to South State Inc. for the project entitled "Windy Willow Way Area Road Improvements". The breadth of the project includes "milling and paving" of the roadway, rebuilding of the sidewalk curb ramps to be ADA compliant, and reconstruction of storm inlets. Curb replacement shall be done as needed for sustaining milling and paving operations. The plans are available for viewing in the Municipal Building in the Engineering Department upon request.

Milling & Paving is expected to begin on October 7, 2020 and begin at 7:00 am to 6:00 pm. and those area milled are expected to be paved by the end of day. Vehicular access to your property will be inaccessible during this process. Residents are to park outside of the designated paving area in the morning and may return by the end of the day. Please note, some cul-de-sacs may be affected. Residents of affected roads should make parking arrangements prior to the paving start time if they plan to leave for the day on unaffected streets.

Please refrain from placing any leaves or debris along the road's edge. Leaving debris may interfere and delay the work. Garbage and recycling may be interrupted during these days.

Day 1 of Milling and Paving: Beginning at the intersection of Woodstock Lane and Old York Road continuing to the left on Windy Willow Way up to Stratford Lane (North).

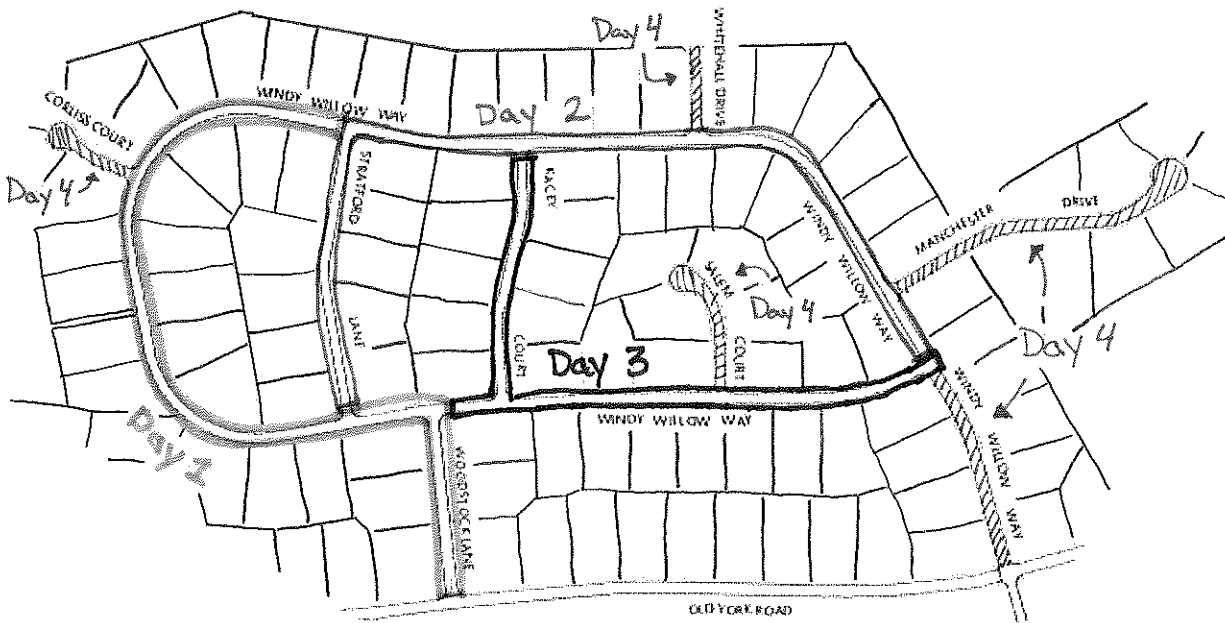

Day 2 of Milling and Paving: Beginning at the southern intersection of Stratford Lane and going north toward Windy Willow. The paving will continue and end at the intersection of Windy Willow/Windy Willow.

Day 3 of Milling and Paving: Beginning at the northern intersection of Kacey Ct. continuing south to Windy Willow. Then work from the intersection of Woodstock working east to the intersection of Windy Willow/Windy Willow.

Day 4 of Milling and Paving: Cul-de-sacs – Paving on Corliss Court, Whitehall Drive, Manchester Drive and from Windy Willow/Windy Willow intersection towards Old York Road.

Affected School Bus Pickup locations: You shall receive all bus stop locations and times directly from the Board of Education.

See additional sheet for general map of the project.

To receive email notifications of this project and other road improvement projects, please register at the Township's website. You can register to receive these updates by going to www.branchburg.nj.us, on the home page, click the words "Email Alert" and sign up for either email alerts or text message alerts.

If you should have any questions, please do not hesitate to contact me at the Engineering Department at (908)526-1300 ext. 142. Your anticipated cooperation is greatly appreciated.
Sincerely,

Stefanie Williams
