Notes:

- Column 1- Associated square footage generating one Affordable unit, Appendix E COAH Regulations.
- Column 2- Fill in the appropriate square footages for each respective use group scheduled for demolition. For Residential, fill in the number of approved residential units on the site scheduled for demolition.
- Column 3- Calculate the number of deducted COAH Units. Divide Column 1 into Column 2. For residential, divide Column 2 by 8.
- Column 4- Fill in the appropriate square footages for each respective use group scheduled for construction. For Residential, fill in the number of approved residential units on the site scheduled to be constructed.

5. Column 5- Calculate the number of added COAH Units. Divide Column 1 into Column 4. For residential, divide Column 2 by 8.
6. Total the number on the bottom of the add and deduct units.
7. Round the number of COAH Units to the nearest hundredths place.
8. Attach any special conditions by resolution.
