

LOWCOUNTRY AREAWIDE WATER QUALITY MANAGEMENT PLAN

Amendment 14

The Cherry Point Waste Water Treatment Plant (WWTP) may be expanded by the Beaufort-Jasper Water & Sewer Authority (BJWSA) from a capacity of 1.6 MGD to 3.2 MGD. This expansion will enlarge and improve the capabilities of the existing Cherry Point WWTP, which has become the primary wastewater treatment facility for the BJWSA Service Area south of the Broad River. As such it reflects the goal of consolidating wastewater treatment facilities where practical to achieve operational and economic efficiencies. The Rose Hill WWTP has recently been taken off-line and wastewater flows from the Rose Hill area are being diverted to the Cherry Point WWTP and the 0.445 MGD Bluffton WWTP will be closed in the next few years and the flows diverted to the Cherry Point WWTP.
