

Flu Vaccine

Flu Vaccine Notice

Please note that the Norwood Health Department will no longer be offering influenza vaccinations in a community clinic setting, beginning with the 2019 fall flu season. This decision was made with careful consideration and data collection over the past few seasons. There has been a steady decline in residents attending these clinics, perhaps due to the increased accessibility of influenza vaccine at other venues.

We encourage you take this opportunity to schedule an appointment for your annual vaccination with your medical provider or a convenient retail outlet.
