RE: 2024 I-Codes

The 2024 I-Codes are currently planned for Town Council consideration and approval in September of this year. When they are approved, there will be certain amendments to the uniform versions.

However, Builders who wish may voluntarily begin using the uniform 2024 I-Codes for plan development prior to the Town's adoption. To do so, Builders may have an authorized representative sign this form acknowledging that such use may involve voluntarily complying with requirements more strict than current Town building Codes (and the 2024 I-Codes eventually adopted by the Town may include somewhat different requirements than uniform versions that Builders will be expected to comply with going forward).

Sincerely,

Russ Harsh
