Plant Pots

Items Needed:

1 egg carton; scissors; black marker; potting soil; four seed packets; spoon; plate; water

Make It
Cut off the top of the egg carton, leaving just the bottom. Separate four egg cups from the carton to create a pot collection and use scissors to trim the edges so they are even and smooth.

Write the name of each plant on one side of each of the egg cups and fill each with a few scoops of potting soil. Place a few seeds of one plant in the appropriately labeled pot. Place all the pots on a large plate and position the plate near a sunny window. Water the plants according to the instructions on each package.

When the plants get too big for the pots, transfer them to a bigger pot or to a garden outside. There is no need to remove the plants from the egg cups when planting in the garden; they will decompose into the soil!
