Ryan Gilmore made the motion and John Leible the second to approve the Board’s minutes of November 19, 2016. The motion was approved.

FINANCIAL REPORT:
Lowes reported lodging tax receipts for the period July 1, 2016 through December 31, 2016 totaled $57,523.31. This is a 9% increase over the prior year’s receipts. Revenues exceeded expenditures by $8,728.68. FY-17 lodging tax receipts are mirroring FY-15 and FY-16 revenue trends.

OPERATIONS REPORT:
Advertising placement for the Spring-Summer marketing program is on schedule. The 2017 Visitors Guide has been printed and distributed to MO Division of Tourism Visitors Centers throughout the State. The 2017 I-Brochure is online, and the Calendar of Events will be released in February.

Lowes provided a brief overview of print campaign. The Board reviewed www.VisitSikeston.Com activity and Search Engine Management (SEM) reports from Madden Media, as well e-newsletter campaign results and toll-free call totals. Attendance at the Visitors Center continues to grow with 2,486 visitors since July 2016.

Prototypes of wayfinding signage will be examined by staff in early February. The project is on schedule for installation in June 2017.

COMMUNITY PROMOTIONS COMMITTEE:
Work on the 2017 Calendar of events is now complete. Area organizations submitted 70 different events for the coming year’s community calendar.

FY-18 MARKETING PROGRAM:
The Board was briefed on FY-17 MO Division of Tourism budget cuts, and those proposed FY-18. Some of the programs in which the City wished to participate will not be available. At this time the CVB expects to receive $25,000 in Matching Marketing Fund monies.

Staff drafted an initial FY-18 marketing plan and operations budget using the Board’s recommendations, and revenue projections provided by the Finance Office. This plan resulted in a significant revenue shortfall. An alternative plan was created focusing on targeted digital marketing with limited print advertising. This would be complimented by billboards on I-55, I-57 and US 60. Fulfillment piece quantities will be reduced substantially. The Board agreed with the concepts presented in the alternative plan. Staff will work with the MO Division of Tourism to draft a funding application for targeted digital marketing.
NEXT MEETING:
The next board meeting will be at 4:30 PM, Tuesday, March 28, 2017 in the C.D. Matthews Room of City Hall.

There being no further business, the meeting was adjourned.

Approved and accepted this date:

Award of Sikeston DPS Body Worn Cameras. (Bid: 16-22)

Attachment(s):
   1. Bid Proposal from Motorola Solutions

Action Options:
   1. Award of Sikeston DPS Body Worn Camera contract to Motorola Solutions
   2. Other action Council may deem appropriate.

Background:

Sikeston DPS is requesting we enter a five-year contract with Motorola Solutions to utilize their Si500 speaker mic/body worn camera solution. DPS began comparing prices between the current camera vendor (Taser Inc.) and Motorola Solutions in 2016.

Sikeston DPS would like to select Motorola Solutions as our body worn camera vendor. We would like to set this as the vendor for a five year time period per the contract offered by Motorola Solutions. Motorola Solutions had a five-year plan, which was less than the five-year price quoted by Taser Inc.
Motorola's Digital Evidence Management Solution (DEMS) combines a body-worn video speaker microphone (VSM) with advanced cloud-based content management. It is designed for law enforcement agencies to simplify workflows from the moment of capture, to review, management and sharing of all forms of digital evidence. Officers save time with seamless uploading of video from the Si500 VSM to CommandCentral Vault which auto-correlates the metadata with existing CAD and RMS, minimizing administrative overhead and increasing actionable intelligence. This unified solution enables officers to automatically tag their ID, date, time and location to audio/video files enabling fast access to the most relevant data for enhanced situational awareness and investigations.

**Body Worn Camera as a Service (BWCaaS)**

BWCaaS combines the power of an Si500/300 with CommandCentral Vault which provides foundation for any body worn program. BWCaaS provides a discount on the Si500/300 lowering initial upfront costs of a body worn camera solution, including CommandCentral Store, Manage and Judicial for all content management needs. By selecting BWCaaS your Agency is also kept up to date on the latest technology with ongoing updates via CommandCentral Vault and next generation of Si device 30 months into a 5 year contract.

**BWCaaS Package Offers:**

- Lower upfront cost on Si500 Video Speaker Microphone (VSM).
- CommandCentral Store.
- CommandCentral Manage.
- CommandCentral Judicial, share evidence online with your judicial partners.
- Built-in Redaction of all video content managed by CommandCentral VAULT.
- Ability to import 3rd party open source digital media evidence and make it part of your chain of custody.
- 150GB of storage per camera, year 1.
- 50GB storage pool increase per camera, per incremental year (years 2-5, +200GB).
- A 5 year contract will provide 350GB of storage per camera at the term of the 5th year.
- All data is pooled into one overall storage bucket.
- Unlimited user accounts, allowing chain of custody to never be broken as officers leave your agency.
- Brand new Si Unit at 30 months into a 60 month commitment.
Sight and Sound Simplified

Motorola’s Si Series Video Speaker Microphones (VSM) allow agencies to trim down the number of devices needed for public safety personnel to do their job effectively. An extension of the high-performing Motorola APX™ radio, the Si Series is a smart interface with an integrated remote speaker microphone and body-worn camera in one. It assures the reliable voice and mission critical sight, sound and security your officers need to work more safely. The Si500 VSM combines voice communications, video, still images, and emergency alerting into one compact and easy-to-use device.

Extend the Power of APX, Best-in-Class Performance

Like our industry-leading APX radios, every feature and function of the Si500 VSM is designed with your safety in mind: from best-in-class audio to purpose-built ergonomics.

- 100+dB Audio delivers APX audio quality
- 5 Integrated microphones with adaptive audio technology
- Articulating camera with optimized field of view and low light performance
- Pre-buffering to capture events prior to recording

COMMANDCENTRAL VAULT

CommandCentral Vault is a cloud-based content management solution to securely store, review, manage and share all forms of digital evidence. It provides a single place to aggregate evidence from multiple sources such as fixed video, social media, body worn cameras (such as the Si500), audio notes and other multimedia sources. Supporting both automatic and manual uploads combined with end-to-end streamlined content management enables agencies to simplify workflows and the overhead of dealing with increasing amounts of content. CommandCentral Vault is fully integrated with Motorola’s Si500 VSM and supports other sources of body worn camera video evidence.

Simplified Storage

Multimedia captured from the Si500 is seamlessly transferred into CommandCentral Vault via secure Wi-Fi network connection. Multimedia stored in CommandCentral Vault is automatically tagged and grouped with associated files from CAD and records systems to reduce manual administrative workload on staff.

CJIS Capable Security

CommandCentral Vault utilizes Amazon AWS as our cloud service provider partner. AWS complies with the FBI's Criminal Justice Information Services (CJIS) standard. The CommandCentral Vault content repository is built on Adobe AEM which has received Federal Risk and Authorization Management Program (FedRAMP) Certification.
FedRAMP is a government-wide program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. FedRAMP is mandatory for Federal Agency cloud deployments and service models at the low and moderate risk impact levels. Numerous government agencies and other entities that provide systems integration and other products and services to governmental agencies are using this same wide-range of AWS FedRAMP services that are incorporated into our CommandCentral Vault evidence manager.

Motorola and AWS recognizes that when one places data in the cloud it puts an absolute priority on timely and secure access to information, wherever and whenever it is needed. To meet these needs, the CommandCentral VAULT cloud infrastructure has been architected to be one of the most flexible and secure cloud computing environments available for storing criminal justice information allowing easy and secure access from within your IT infrastructure. Our architecture provides an extremely scalable, highly reliable platform enabling you to deploy CommandCentral Vault quickly and securely in support of a wide variety of security and regulatory requirements, to include Criminal Justice Information Services (CJIS) workflows according to the CJIS Security Policy (CJISD-ITS-DOC-08140-5.4).

Motorola complies with the FBI’s Criminal Justice Information Services (CJIS) standard. Motorola along with our partner Amazon Web Services, will sign the CJIS security agreements (CJISD-ITS-DOC-08140-5.4), including allowing or performing any required employee background checks according to the CJIS Security Policy. We will continually support any changes to The Security Addendum requirements as we assume there may be future security requirement changes.

**CommandCentral Vault Key Features**

- CJIS-capable via AWS GovCloud
- Automated redaction, eliminating tedious frame-by-frame process
- Dynamic watermarking to prevent unauthorized screen capturing and sharing
- Secure chain of custody with cryptographically signed content, preventing manipulation
- Role-based access
- Advanced end-to-end content management: capture, review, manage, share

**CommandCentral Vault - Store Module**

The CommandCentral Store module is the baseline package provided by CommandCentral Vault and is offered on a per user license basis. It provides licensed users the ability to seamlessly upload content from multiple sources, including body-worn devices via secure WiFi. Cloud storage that meets CJIS standards is included as well as the ability to perform the following actions on stored content:

- Annotate images and video to provide additional context during review
- Automatic association of stored content with CAD/RMS data to group related case files and provide faster search for case related content
- Review content and associated metadata with geospatial mapping playback
- Chain of custody controls to preserve and verify original content
- Mark content to adhere to retention policies

**CommandCentral Vault - Manage Module**
With the optional Manage module your agency can select to enhance content management capabilities. With the Manage module your entire agency (per user licensing does not apply) is provided all the capabilities with the baseline Store module, including:

- Agency-wide content search for permitted users
- Enhanced review functionality with playback speed controls
- Additional administrative content restriction controls
- Automated redaction based on facial and/or object recognition

**CommandCentral Vault - Judicial Module**

With the optional Judicial module your agency can rapidly share evidence and other content with legal personnel reducing administrative overhead and delays. With the Judicial module your entire agency (per user licensing does not apply) is provided all the capabilities of the Store and Manage modules, including:

- Creating video clips to provide specific evidence related to a judicial request
- Restricted distribution to ensure only permitted individual have access to necessary content
- Secure links to requested content to maintain chain of custody

CommandCentral Vault supports an automated redaction capability to facilitate the processing of digital evidence prior to release pursuant to a public information request. Utilizing “object tracking” technology, a FOIA/FOIL compliance officer can easily obscure the identity of juveniles, domestic battery and sexual battery or undercover police officers that are included in the initial evidence capture. CommandCentral Vault ensures end-to-end security of stored content, and original content is never edited to reduce challenges to the chain of custody. Full auditing allows your agency to track all activity on content from the moment it’s stored and classified.
