Bottled Water Testing

December 18, 2019

The Massachusetts Department of Environmental Protection (MassDEP) surveyed Massachusetts permitted bottled water companies to determine if they sampled their water sources for Per- and Polyfluoroalkyl substances (PFAS) identified by the EPA laboratory Method 537 or 537.1, and to request that they voluntarily share the results of such testing with MassDEP for posting to the Commonwealth's website.

The bottled water companies listed below have tested for PFAS and reported their laboratory results to MassDEP. PFAS was not detected in their water. The last column in the table below is a link to the individual lab reports. When using this information you should check the lab reports to see the Reporting Limit (RL) used by the lab. The Reporting Limit is the lowest concentration at which a chemical can be detected in a sample and its concentration can be reported with a reasonable degree of accuracy and precision. You should also check the individual lab report for the units of measure: parts per trillion (ppt), micrograms per liter (ug/L), or milligrams per liter (mg/L). If you have any questions on a lab report you should contact the company contact.

Company	Brand Name(s)	Contact Info	Lab Report link
Berkshire Springs Inc.	Berkshire Springs	www.berkshiresprings.com Felix Graham-Jones felixgj@berkshiresprings.com	Lab Report 4-18-2019

In Massachusetts, bottled water is regulated by state and local authorities. For more information on this program see <https://www.mass.gov/lists/bottled-water-resources>.

If you are a Massachusetts registered bottled water company and would like to be on this list please review the survey letter at <https://www.mass.gov/doc/testing-bottled-water-for-pfas> and submit the requested information. If you have any questions on this information please contact the MassDEP Drinking Water Program at program.director-dwp@mass.gov subject: PFAS Bottled Water Survey.
